SXC | WHITEPAPER

A Modern Crypto Reward Ecosystem

Version 1.0 • August 2026 • sexcoin.it

1. Important Notice

This document is provided for informational purposes only and does not constitute financial, investment, or legal advice. SEX COIN (SXC) is an early-stage utility token project. It does not currently have an active liquidity pool, a public trading market, or a live cashback mechanism. Statements about future features, partnerships, or utility describe the project's intended roadmap and are not guarantees of outcome. Participation in any cryptocurrency project involves risk, and readers should conduct their own research before engaging with the token in any way.

2. Introduction

SEX COIN (SXC) is an ERC-20 token deployed on the Ethereum blockchain, designed as the foundation of a future cashback-based crypto reward ecosystem. The project's long-term goal is to connect digital platforms, real-world services, and next-generation value exchange through a token-based rewards model, where user engagement and participation can translate into tangible value.

SEX COIN is currently in an early development stage. The smart contract has been deployed and is publicly verified on Etherscan, but the reward mechanisms, partner integrations, and liquidity infrastructure described in this document are part of the project's roadmap and are not yet operational.

3. Token Overview

Token Name	SEX COIN
Ticker	SXC
Standard	ERC-20 (Ethereum)
Max Total Supply	1,000,000,000 SXC
Decimals	18
Contract Address	0x7eB4dB01000a472d4FD744b72Be24e391Cdd0dC8
Contract Status	Verified on Etherscan
Current Holders	Founding team only (pre-distribution stage)
Liquidity Pool	Not yet active

All figures above reflect on-chain data as verifiable on Etherscan at the time of publication. As the project has not yet launched publicly, supply is held by the founding wallet pending future distribution.

4. Tokenomics & Allocation

The total fixed supply of 1,000,000,000 SXC is allocated across five categories, designed to support long-term ecosystem rewards, market stability, and sustainable development:

Category	Percentage	Allocation (SXC)
Cashback Rewards	70%	700,000,000
Liquidity Pool	10%	100,000,000
Team	10%	100,000,000
Marketing	5%	50,000,000
Development	5%	50,000,000

4.1 Cashback Rewards (70%)

The largest share of the supply is reserved for the cashback reward pool that will power the ecosystem's core utility once launched. This mechanism is not yet operational.

4.2 Liquidity Pool (10%)

Reserved to support future market stability and sustainable token circulation once a public trading pair is established. No liquidity pool currently exists for SXC.

4.3 Team (10%)

Allocated to the founding team, supporting continued development of the project.

4.4 Marketing (5%)

Reserved for future community growth, partnerships, and awareness initiatives.

4.5 Development (5%)

Reserved for ongoing technical development, audits, and infrastructure costs.

5. How the Ecosystem Works (Planned Model)

The following describes the intended flow of the SexCoin ecosystem once cashback mechanics and partner integrations are live. None of these mechanisms are active at the time of publication.

Step 1 — Interact

Users engage with supported services and future ecosystem partners.

Step 2 — Receive Cashback

A smart-contract-based reward mechanism is intended to distribute SXC automatically following verified participation.

Step 3 — Unlock Utility

Tokens accumulated through the ecosystem are intended to be usable across future premium features, benefits, and integrations.

6. Partnerships & Ecosystem Expansion

SEX COIN's roadmap includes collaboration with digital platforms, creators, subscription services, and online ecosystems, aiming to build a cashback infrastructure powered by crypto utility. As of this document's publication, no specific commercial partnership agreements have been finalized or announced. Categories of interest for future integration include:

- Digital entertainment and subscription platforms
- Membership and engagement-based services
- Reward-network integrations connecting real-world and digital activity

7. Team

Giuseppe Vito Quero — Founder & CEO

Leads the vision, strategy, and overall development of the SexCoin ecosystem.

Massimo Macaru — Technical Manager and Administrator

Responsible for blockchain infrastructure, smart contract management, and project security.

8. Roadmap

- **Stage 1 — Foundation (current):** Token deployment, contract verification, website launch, whitepaper publication.

- **Stage 2:** Community channels launch, expanded public information, project listing updates.
- **Stage 3:** Liquidity pool establishment and public market availability.
- **Stage 4:** Activation of the cashback reward mechanism.
- **Stage 5:** Partner integrations and ecosystem expansion.

Timeline is indicative and subject to change based on development progress, regulatory considerations, and market conditions.

9. Risk Disclosure

- SXC currently has no liquidity pool, public market price, or trading volume.
- The cashback and reward mechanisms described in this document are not yet operational.
- Cryptocurrency projects, including early-stage tokens, carry significant financial risk.
- This document does not constitute an offer or solicitation to buy or sell any token or security.
- Prospective participants should conduct independent research and consult professional advisors as needed.
